Emmanuel Owolabi – FrontEnd Developer

Lagos, Nigeria • owoemma59@gmail.com • 070 6614-0323 • 081 3846-9203 • [GITHUB] • [GITLAB]

Summary

An experienced and self-taught Software Engineer with 2+ years of industrial experience. My passion for technology and how the internet works motivates me to become a better Developer day by day, and I prioritize my knowledge and skills over any other thing. My interests lie in-between learning new technologies, giving back to the community by teaching, and meeting new people. If you do not catch me coding, then I'm either reading or playing video games. I look forward to exploring more in the technology industry while solving real world problems.

Relevant Skills

PERSONAL SKILLS

- With my quick learning ability, I was able to transition from Civil Engineering into Software Development within 2 months of personal learning.
- The first intern in my current organization to be promoted into a full-time staff within 3 months.

- Typescript
- React.JS
- Next.JS
- Angular.JS
- Redux State Management
- CSS / Tailwind CSS
- HTML5
- Styled Components
- Git (Gitlab & Github)
- SSH(Basic)

Projects

- **TM30 OFFICIAL WEBSITE** - https://www.tm30.net/

The official TM30 website is built on JavaScript. I worked on converting the whole UI design into a live and cross-platform website. The tech stack includes JavaScript, React JS, Vite, and Styled Components.

- **CIT-MFB** — Visit Live Website

A Bankpro integration, which poses as a one-time solution for micro-finance banks, I worked on creating the User-Interface for CIT-MFB. The user-interface which includes everything a customer can need to perform transactions, corporate-banking features, and also an admin platform for managing customers.

- **KC-MFB** — Visit Live Website

Another part of Bankpro's integration. I worked on creating the User-Interface for KC-MFB. The user-interface which includes everything a customer can need to perform transactions, and an admin platform for managing customers.

- **TMSAAS** — https://saas.tm30.net

I converted a client interface design for my organization's SAAS platform (saas.tm30.net). The website and web application is cross-platform responsive. I created this using React, React Bootstrap for styling, and Redux for state management.

- **ADASHIESUSUAKAWO** - https://adashiesusuakawo.com/

AdashiEsusuAkawo is a financial tool that allows individual or a group of individuals to contribute to reach a target. Think about it like your normal contribution but with a more automated, efficient, and reliable way. I used Typescript, ReactJS, Styled Components, and Redux.

- **OFFICIAL BANKPRO**– Under development

Bankpro is an enterprise grade mobile-first internet/mobile banking platform that enables financial institutions to accelerate time to market. It offers capabilities for omni-channel experiences with highly customizable features.
